

## What Should I Do?

### Directions for Student Research

Choose one of the following animals that lives in a temperate deciduous forest habitat:

- raccoon
- mallard duck
- red fox
- cardinal
- squirrel
- white tailed deer
- beaver
- ant
- earthworm
- rabbit

Find out:

1. where the animal lives and sleeps
2. what it eats
3. how it uses it's habitat to survive (e.g. hide in trees to be safe from predators)
4. what the animal looks like and draw a picture of it
